

ABSTRACT OF THE INVENTION
SOLAR PANEL ASSEMBLY AND SOLAR POWER SYSTEM
INCLUDING SAME

5 A solar panel assembly includes a base having
tubular bodies, a support unit including support
frames connected between the tubular bodies and
supporting rods extending upwardly from the
supporting frames, a solar power panel disposed on
the supporting rods, and a reflector plate disposed
10 between the base and the solar panel to reflect light
rays to a bottom surface of the solar panel. A solar
power system includes a plurality of the aforesaid
solar panel assemblies and multiple connectors.
