FIG. 2A

(57) **Abstract:** Provided herein are compositions and methods for ablating intracellular signaling through specific cell surface receptors as means of treatment for various conditions of a pro-inflammatory character. In some aspects, the compositions and methods are to prevent the progression of osteoarthritis and other arthritides and to treat osteoarthritis and other arthritides in a mammalian joint. In some aspects, the compositions and method are for treating or preventing localized nociception, inflammation, degeneration, or morphological changes associated with back or spine conditions or disorders.
