ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: ADAPTER MODULE WITH RETENTION LATCH

(57) Abstract: An adapter module is provided with a bail latch mechanism that serves to engage and disengage the frame into which the adapter module fits. The bail latch is movable between two positions and it engages a cam member formed as part of the module that cams two opposing free ends of the bail latch inwardly into the module to thereby release it from the adapter frame.
