(54) Title: METHOD FOR MOVING CHINESE INPUT CANDIDATE WORD BOX AND MOBILE TERMINAL THEREOF

(54) 发明名称: 一种中文输入候选词框的移动方法及移动终端

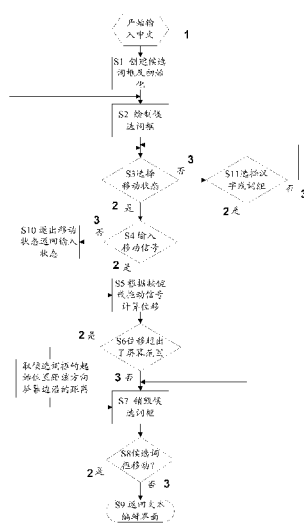

图 2 / Fig. 2

(57) Abstract: A method for moving a Chinese input candidate word box and mobile terminal thereof, wherein, the method includes: creating a candidate word box and drawing the box in a position within range of screen; analyzing and computing moving distance after generating input signals through dragging or operating directional keys or soft keys directly and moving the candidate word box by a user; destroying the candidate word box in situ when the moving distance is within range of the screen and re-drawing the candidate word box in new position which moved to. The method and the mobile terminal thereof enable moving the position of the candidate word box arbitrarily in range of screen according to user requirement when the user inputs, so that the user can acquire visual field in range of the whole screen, thus increasing utilization rate of range of the screen.
