(54) Title: A PARTITION WALL UNIT

(57) Abstract: The present invention relates to a partition wall unit for receiving utility lines, said partition wall formed in addition to a pre-existing wall of a construction, said partition wall unit formed by at least a first panel, said first panel having a first surface and a second surface, said second surface having at least a protrusion extending from a region of said second surface, wherein the partition wall unit further includes an attachment means to attach said first panel to a further surface, said protrusion allowing the second surface of the first panel to be positioned spaced apart from the further surface, and wherein the spacing thus formed therebetween said second surface of the panel and the further surface forms an enclosure to receive utility lines of a construction.
