(54) Title: MARKER FOR USE IN IDENTIFYING OR PREDICTING ANGIOGENESIS

(57) Abstract: The present invention provides a labelled cell stress marker for use in identifying or predicting angiogenesis in a subject. Also provided is a method of identifying or predicting angiogenesis in a subject, the subject having been administered a labelled cell stress marker. The method comprises the steps of (a) generating an image from the subject using a first imaging device and (b) identifying labelled cell stress marker positive cell(s) in the image. Angiogenesis is identified or predicted if labelled cell stress marker positive cell(s) are identified in the image.
