You are Task Oriented/Structured This job has plenty of well-defined job roles and candidate is expected to complete them on time. Independent/Self-Reliant This job is highly independent and requires very little supervision. At times, the candidate has to figure out how to create value for the startup.	
You prefer Back Office This job is more behind the scenes, where you provide essential operations to the company. Some functions include software engineering, accounting and graphic design. Front Office This job requires direct interaction with customers and you are also required to communicate key information to the relevant personnel	
You would Like to try something new This job may not be directly related to your field but you are someone who is willing to learn and experiment with a different area. (i.e. a student from School of Infocomm Technology with a software engineering Background could attempt an internship role as a data analyst) Want to further enhance your technical skills Jobs that will further enhance and harness the skills and knowledge you learnt in your courses.
