ABSTRACT

The purpose of the present invention is to provide means for enabling parties involved in an international trade transaction to properly proceed with procedures for export and import of a cargo according to its transportation status. Provided is a program for causing a computer to execute a method comprising: obtaining information on a state of a cargo; and executing a procedure for an international trade transaction associated with the cargo based on the information on the state, the program being capable of displaying on a screen of the computer the information on the state of the cargo and progress of the procedure for the international trade transaction associated with the cargo.
