1

Creation of the shipping label

Create your shipping label and make sure that both barcodes are included - the indent code and the routing code including the correctly coded destination address.

2

Printing the shipping label

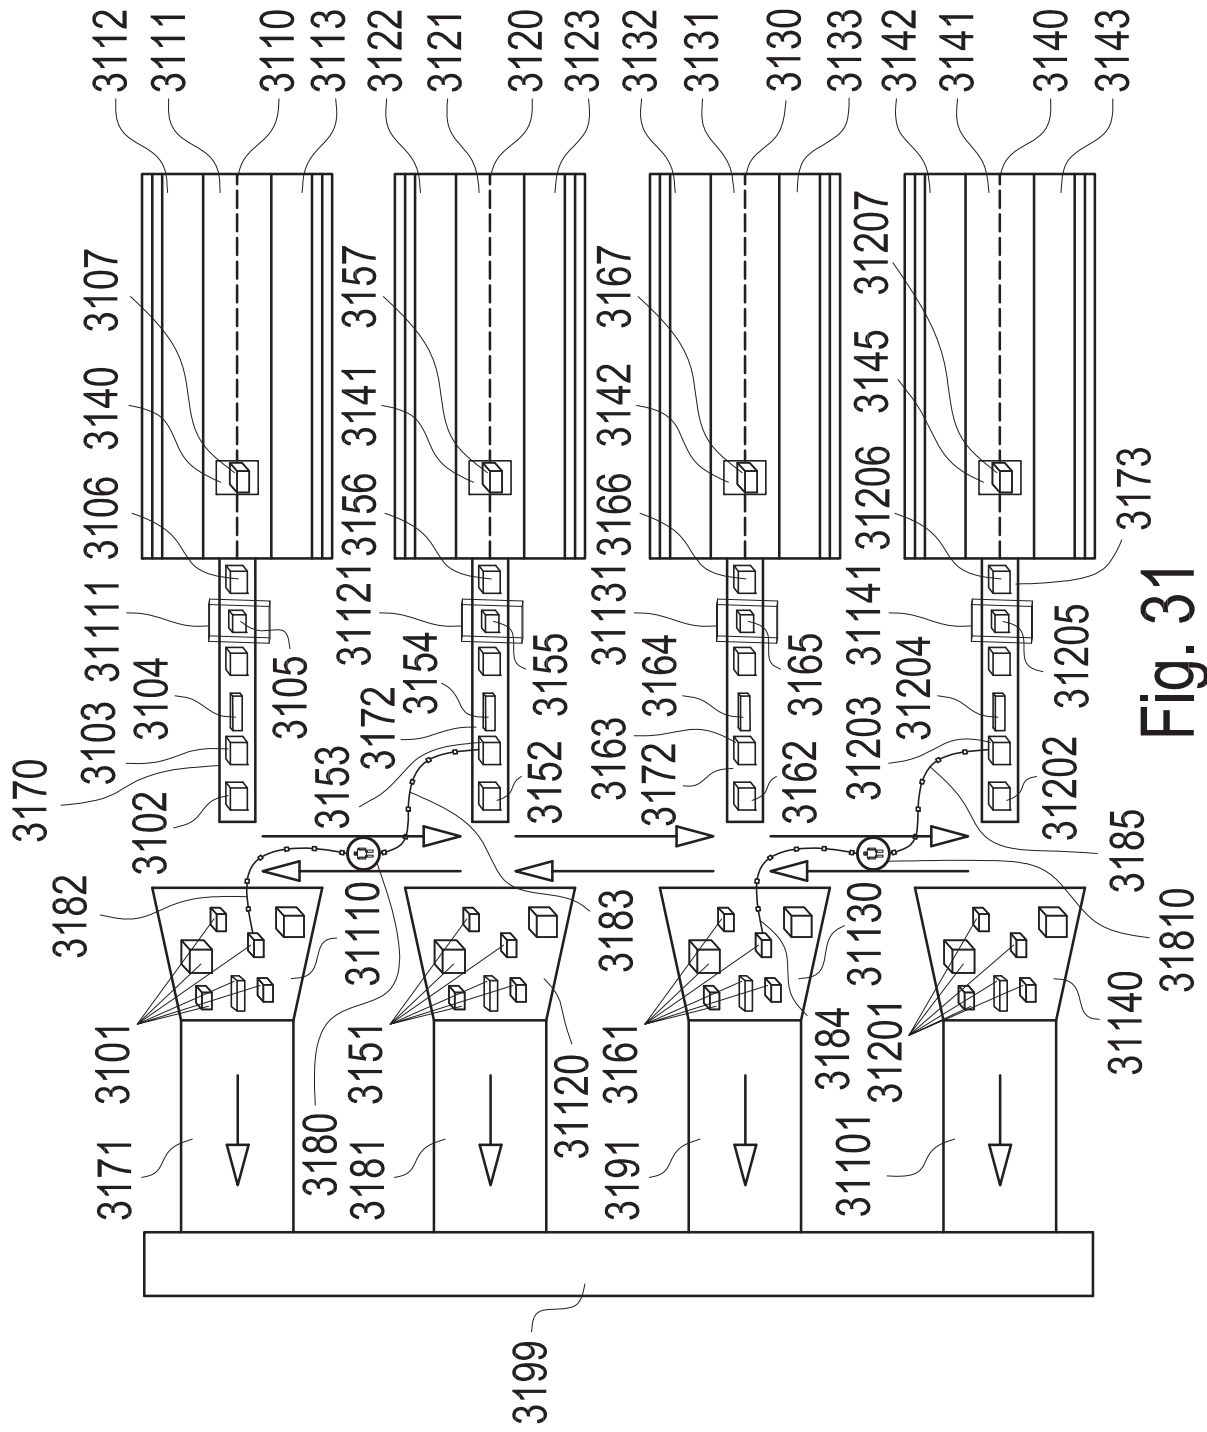

Print the shipping label and make sure that the label is printed without printing errors and that the size of the barcodes and the resting spaces between the barcodes and to the label edge are respected.

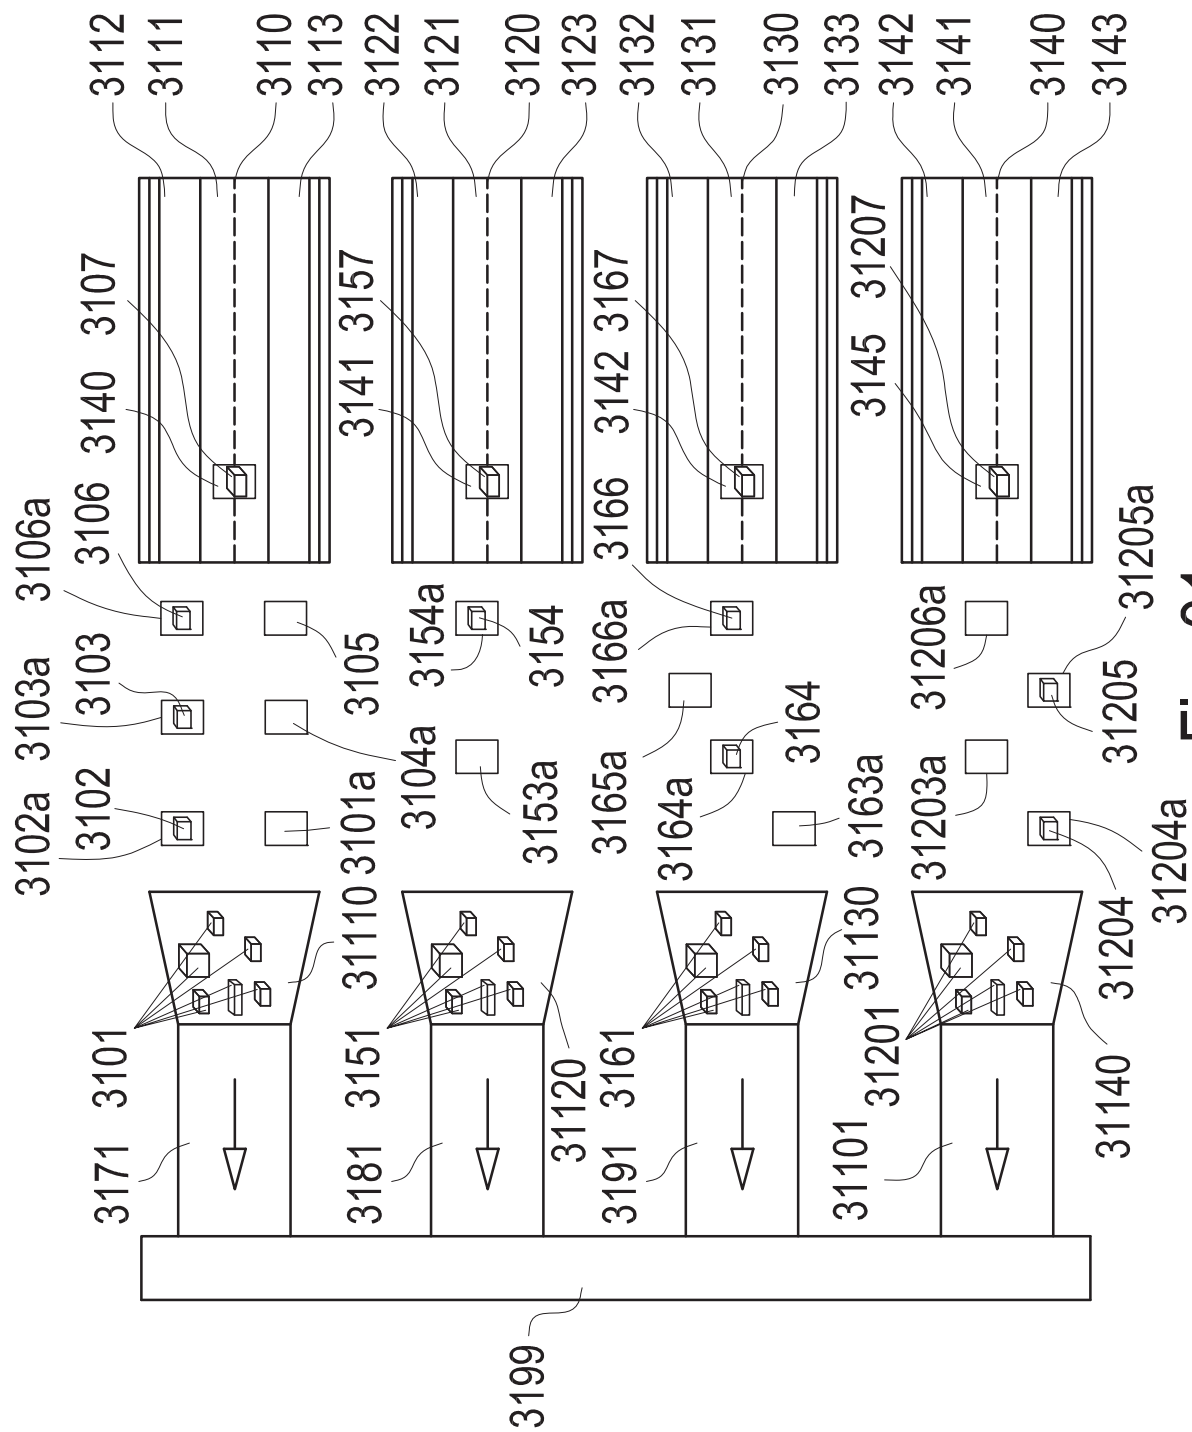

3

Attaching the label

Apply the shipping label to the largest surface of your package, making sure that the label is applied completely smoothly and is not obscured by strapping or tape.
