- 201 A first device obtains configuration information, the configuration information being used for indicating whether the first device supports optional functions fed back by an HARQ
- 202 The first device sends direct connection control information to a second device on the basis of the configuration information, the direct connection control information comprising a first type of direct connection control information and a second type of direct connection control information, one of the first type of direct connection control information and the second type of direct connection control information comprising a first field, and the first field being used for indicating an HARQ feedback approach of multicast communication data transmission

(57) Abstract: The present invention relates to the technical field of communications, and relates to feedback approach indication and determination methods and apparatuses, and a storage medium. The method comprises: a first device obtains configuration information, the configuration information being used for indicating whether the first device supports optional functions fed back by a hybrid automatic repeat request (HARQ); and the first device sends direct connection control information to a second device on the basis of the configuration information, the direct connection control information comprising a first type of direct connection control information and a second type of direct connection control information, one of the first type of direct connection control information and the second

本国际公布:

— 包括国际检索报告 (条约第21条(3))。

type of direct connection control information comprising a first field, and the first field being used for indicating an HARQ feedback approach of multicast communication data transmission. On the basis of whether the first device supports the optional functions of the HARQ, how to use the direct connection control information to indicate the HARQ feedback approach of multicast communication is determined, and an application is flexible.

(57) 摘要: 本公开是关于一种反馈方式指示和确定方法、装置、存储介质, 属于通信技术领域。所述方法包括: 第一设备获取配置信息, 所述配置信息用于指示所述第一设备是否支持混合自动重传请求HARQ反馈的可选功能; 所述第一设备基于所述配置信息向第二设备发送直连控制信息, 所述直连控制信息包括第一类直连控制信息和第二类直连控制信息, 所述第一类直连控制信息和所述第二类直连控制信息中的一个包括第一字段, 所述第一字段用于指示组播通信数据传输的HARQ反馈方式。基于第一设备是否支持HARQ的可选功能来确定如何利用直连控制信息指示组播通信的HARQ反馈方式, 应用灵活。
