

SENDING AGGREGATION-CODE-BASED PAYMENT PAGES

ABSTRACT

Embodiments of this specification disclose a method, an apparatus, and a device for sending an aggregation-code-based payment page, and a medium. Solutions include the following: A first server obtains code information obtained by scanning a target aggregation code by a terminal device; obtains a standard payment page in a predetermined format corresponding to the code information, where page information included in the standard payment page is obtained by the
5 first server from page information of a historical payment page provided by a second server for the target aggregation code; and sends the standard payment page to the terminal device.
