(54) **Title**: RADIATION SOURCE

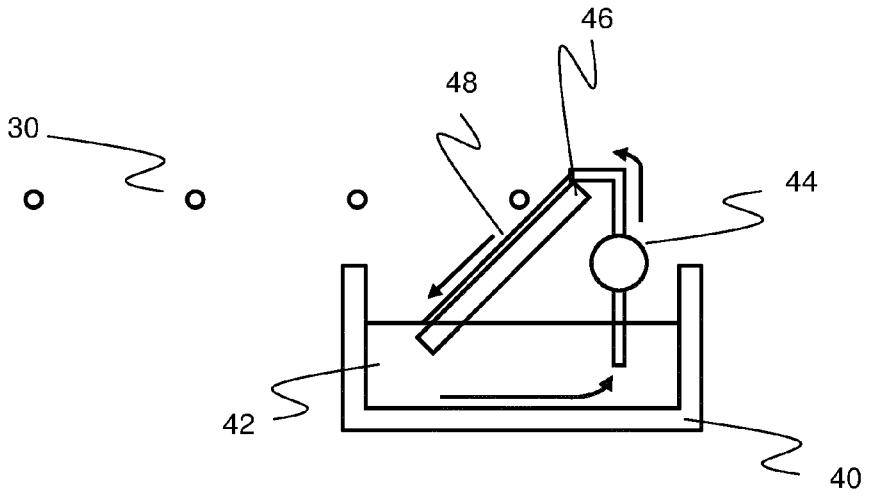

FIG. 4

(57) **Abstract**: A radiation source includes: a nozzle configured to direct a stream of fuel droplets (30) along a trajectory towards a plasma formation location; a laser configured to output laser radiation, the laser radiation directed at the fuel droplets at the plasma formation location to generate, in use, a radiation generating plasma; and a catch configured to catch fuel droplets that pass the plasma formation location, the catch including: a container (40) configured to contain a fluid (42); a driver (44) configured to drive the fluid, to cause the fluid to move; the catch being configured such that the fuel droplets are incident on that moving fluid.
