(54) Title: GENERIC INDICATION OF ADAPTATION PATHS FOR SCALABLE MULTIMEDIA

(57) Abstract: A file format structure for use with scalable video coding systems and methods, where a rate share operation box indicates which adaptation operation points for coded media are available in a file. The rate share operation box can include a characterization of the adaptation result for each adaptation operation point. In addition, the rate share operation box can include an identifier that indicates which algorithm was used in generating each adaptation operation point.
