

OXYGEN BEAUTY AND HAIR CARE CAP

ABSTRACT

5 An oxygen beauty and hair care cap, comprising: a cap to
be put on the user's head; a gas supply duct, whose one
end is connected to an ozone supply system and whose
other leads into the interior of the cap, to allow ozone
to flow into the interior of the cap; and a gas flow
system, which is installed inside the cap and is
connected to the gas supply duct to evenly spread ozone
10 gas inside the space enclosed by the cap; wherein the
combination of the parts allows the user's hair roots to
take in oxygen and the hair tips to strengthen, removing
dirt particles in the hair pores for beauty and hair
care, and allows the head skin to breathe oxygen,
15 vitalizing the cells and furthering blood circulation for
better health and a feeling of pressure relief and
refreshment.
