

ABSTRACT

5 The embodiments provide a power control method for a link, which includes
that: User Equipment (UE) receives a message from a network side, the message
containing adjustment information for instructing the UE to adjust uplink transmit
power; the UE analyzes the message to acquire the adjustment information, and
extracts a adjustment strategy associated with the adjustment information according to
10 the adjustment information; and the UE adjusts the uplink transmit power according
to the adjustment strategy. The embodiments have the advantage of improving power
adjustment efficiency.
