(54) Title: SYSTEM AND METHOD OF BUILDING WIRELESS COMPONENT APPLICATIONS

(57) Abstract: A system and method of building wireless component applications are provided. Component applications are executed on mobile communication devices, which communicate with a web service via a wireless network and the Internet. The component applications comprise data components, presentation components, and message components, which are written in XML code. The component applications further comprise workflow components which are written in a subset of ECMAScript, and are embedded in the XML code.
