

## **A DEVICE AND A METHOD FOR CLEANING INTERIORS OF RECEPTACLES AND FACILITIES**

### **ABSTRACT**

The invention relates to an appliance (10.1-10.8) as well as to a method for removing deposits in interiors (71) of receptacles or facilities (51.1-51.6) by way of explosion technology. The appliance (10.1-10.8) comprises a supply device (37) for providing an explosive mixture or its starting components, as well as a transport conduit (1.2-1.3) which is connected to the supply device (37) and is for transporting explosive mixture to a cleaning location. The transport conduit (1.2-1.3, 91) is designed at least in sections as a transport hose.
