(54) Title: LIGHT-CURING OVEN

Fig.2

(57) Abstract: A light-curing oven (1; 100) comprising: a light-curing chamber (2) configured to contain one or more objects (A) to be light-cured; a source (3) of light-curing rays arranged inside the light-curing chamber (2); a vacuum pump (4) with a suction duct (5) communicating with the light-curing chamber (2) and means (6; 106) for moving the objects (A) during the light-curing process. The moving means (6; 106) comprise an electric motor (7; 107) with a drive shaft (8) mechanically associated with means (9) for supporting the objects (A) to be light-cured, the electric motor (7; 107) and the drive shaft (8) being configured in such a way that they define for the objects (A) a horizontal rotation axis (X). The moving means (6; 106) also comprise means (10; 11) for making the objects (A) vibrate during their rotation.
