(54) Title: SYSTEM AND METHOD FOR PROVIDING AN INTERNET PORTAL URL LINK THROUGH AN E-MAIL PROMPT FOR THE DELIVERY OF SOLICITED AND UNSOLICITED INFORMATION BASED ON THE ORIGINAL INFORMATION REQUEST

(57) Abstract: An information system for selectively providing information in response to a request from a user comprises memory, for storing several databases of information; a search unit, for analyzing the user request and retrieving information related to said request from the memory to generate a first output information signal and for analyzing the first output information signal and retrieving information related to the first output information signal from the memory to generate a second output information signal. The system also includes a webpage unit for receiving the first and second output information signals and selectively displaying said signals on a webpage. The system notifies the user via an output unit, which generates an e-mail to the user which includes the address of said webpage.
