

**JOSS PAPER BURNER****ABSTRACT**

A joss paper burner has a furnace body, a furnace cover, and an ash bucket. The furnace body has a first body, a second body inside the first body, an annular channel  
5 formed between the first and the second bodies, and a bracket inside the second body. The furnace cover covers the first body and has a cover body, an upper cover, a lower cover inside the second body, and a cover opening formed through the cover body to form an outlet space between the upper and the lower covers. The ash bucket is disposed below the furnace body. Joss papers can be efficiently and completely burned in the joss paper burner.
