ABSTRACT

The present invention relates to methods of treatment of menstrual cycle induced disorders and symptoms with cathinone, particularly methods employing 3-methyl methcathinone (3-MMC). The present invention also relates to kits comprising 3-MMC for use in the treatment of subjects suffering from menstrual cycle induced disorders and symptoms. In particular, methods and kits for therapy of menstrual cycle induced disorders and symptoms with 3-MMC for a variety of disorders and/or conditions, including PMS, PMDD and perimenstrual disorders are provided.
