(54) Title: WIRELESS MESSAGE DELIVERY SYSTEM

(57) Abstract

A wireless message delivery system includes a wired messaging network (102) which delivers E-mail messages between wired network nodes, and which further inputs E-mail messages for delivery to a wireless messaging unit (106). A wireless messaging server (104) is coupled to the wired messaging network (102), and receives and processes the E-mail messages inputted from the wired messaging network (102) for delivery to the wireless messaging unit (106). A wireless messaging network (106) is coupled to the wireless messaging server (104) and delivers the E-mail messages to the wireless messaging unit.
