

ABSTRACT

To improve safety of a wearer and performance for preventing damage to an eyeglasses frame. In an eyeglasses frame including a pair of rims 11R and 11L that fix lenses LR and LL, a bridge 12 that connects the pair of rims, and each of temples 14R and 14L connected to each of the rims 11R and 11L via each of endpieces 13R and 13L, the eyeglasses frame 1 includes an outer shell section and an inner shell section that is softer than the outer shell section and is provided in at least a part of an inner side of the outer shell section, and the inner shell section includes temple inner shell sections 14RI and 14LI provided on the inner side of the temple of the outer shell section.
