ABSTRACT

Electronic Information Management System, IC Card, Terminal Apparatus And Electronic Information Management Method, And Recording Medium On Which Is Recorded An Electronic Information Management Program

An electronic information management system, an IC card, a terminal apparatus and an electronic information management method, and a recording medium on which is recorded an electronic information management program, which displays a plurality of images simultaneously or hierarchically to thereby carry out authorization of access to electronic information based on an image password which is easily remembered and difficult to appropriate.
