(54) Title: PACKS FOR BEVERAGE PREPARATION SYSTEM

FIGURE 1

(57) Abstract: The invention concerns a beverage production system comprising a pack (10) and a module (1) for producing a beverage from the pack, - said pack (10) comprising an area (104) configured for being openable, and - said module (1) comprising: a fluid processing device (11) comprising an upwardly pointed end (114), and at least one internal inlet conduit (111) for introducing a fluid into said pack for the preparation of a beverage by mixing said fluid with an ingredient contained in said pack, and at least one internal outlet conduit (112) for dispensing said beverage from said pack, and, an actuating device (12) to move said fluid processing device (11) and said pack (10) one to the other wherein the openable area (104) of the pack is made of a film of material, said film of material being first stretchable around the upwardly pointed end (114), and then pierceable by the upwardly pointed end and during the upward movement of the fluid processing device through the openable area (104).
