

ABSTRACT

The invention relates to an event system (10, 50) for an animated event, wherein the event system (10, 50) comprises: at least one event furniture component (100, 200, 250, 300, 350) which can be moved in space and which comprises at least one table and/or at least one chair, and a device for sensory stimulation (12, 52) of guests (1) of the animated event, wherein the event furniture component (100, 200, 250, 300, 350) which can be moved in space comprises movement means for mechanical movement, and wherein the event system (10, 50) also comprises a first controller (1901) which is designed to control the mechanical movement and the output of the device (12, 52) for sensory stimulation of guests (1) of the animated event in a synchronized manner. The invention also relates to a method for operating such an event system (10, 50).
