

## ABSTRACT

The present application provides a virtual scene interactive processing method and apparatus, and an electronic device, a computer-readable storage medium and a computer program product. The method comprises: displaying a virtual scene, wherein the virtual scene comprises identifiers of a plurality of accounts, and each of the accounts can use at least one virtual object to interact with at least one virtual object used by another account; displaying a counter button; and in response to a trigger operation for the counter button, displaying a counter control, wherein the counter control comprises the number of each type of virtual object that has been used and the total number of each type of virtual object that can be used.
