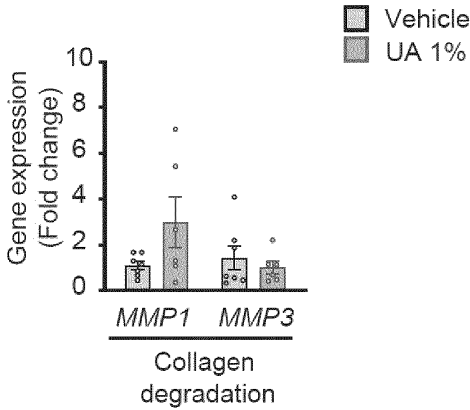

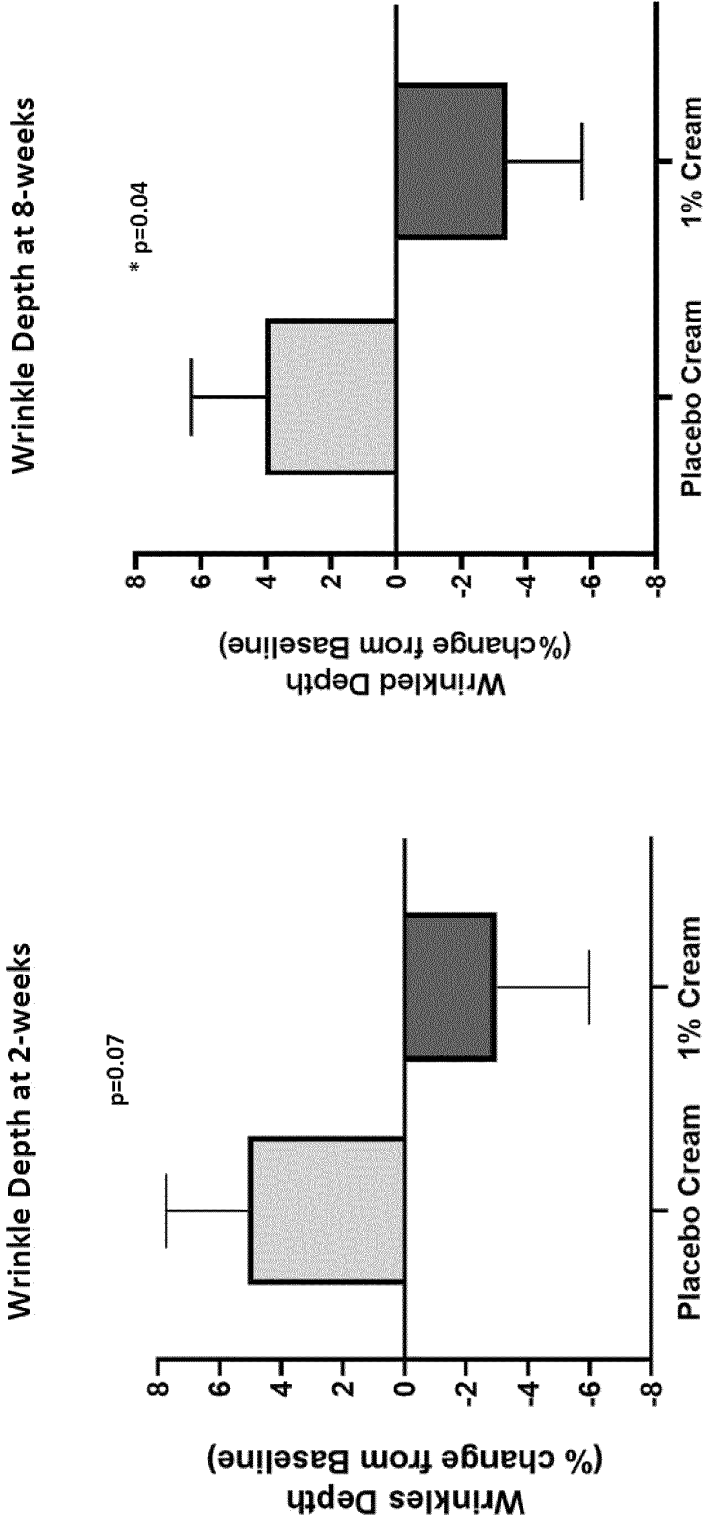

Figure 16D

1% Mitopure only containing cream has an anti-wrinkle effect

The effect is already visible at 2-weeks after daily topical application

Figure 17

0.5% Mitopure cream has no impact on reducing wrinkles

Primary Endpoint: % Change in Wrinkle Reduction after 8-weeks (2 different products containing UA+Trehalose+Niacinamide)

Ra parameter
Average Skin roughness

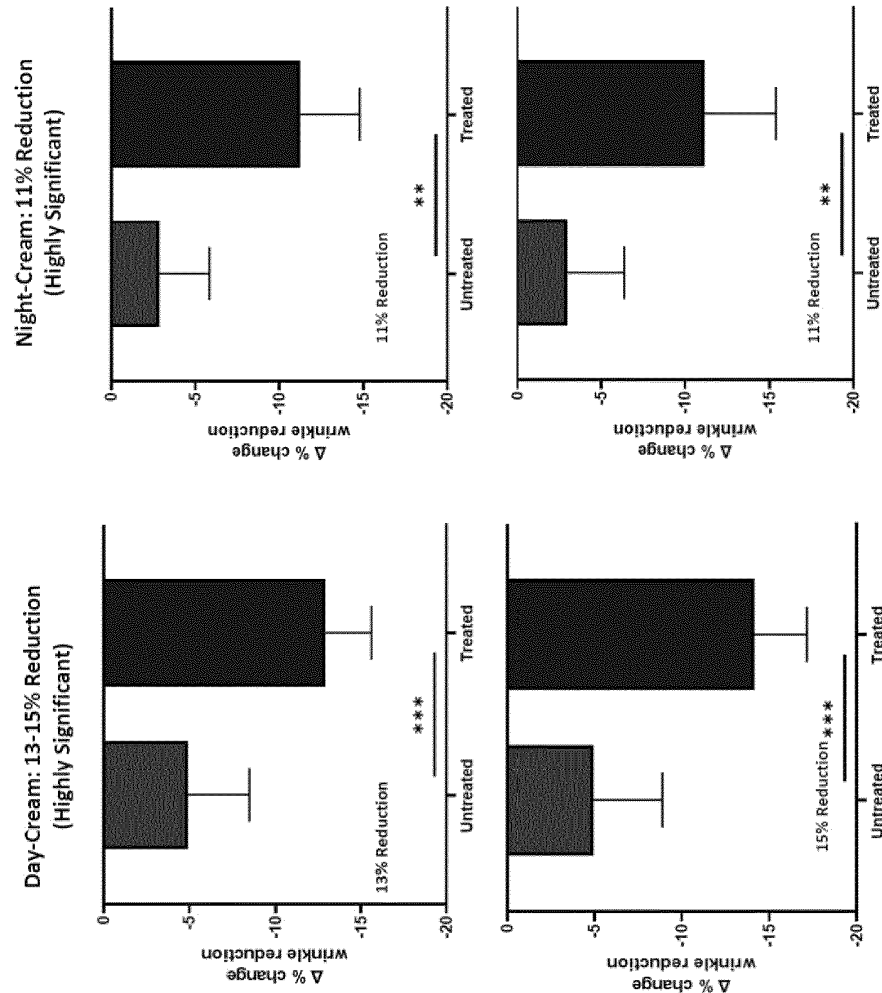

Figure 19

Secondary Endpoint: % Change in Hydration after 8-weeks

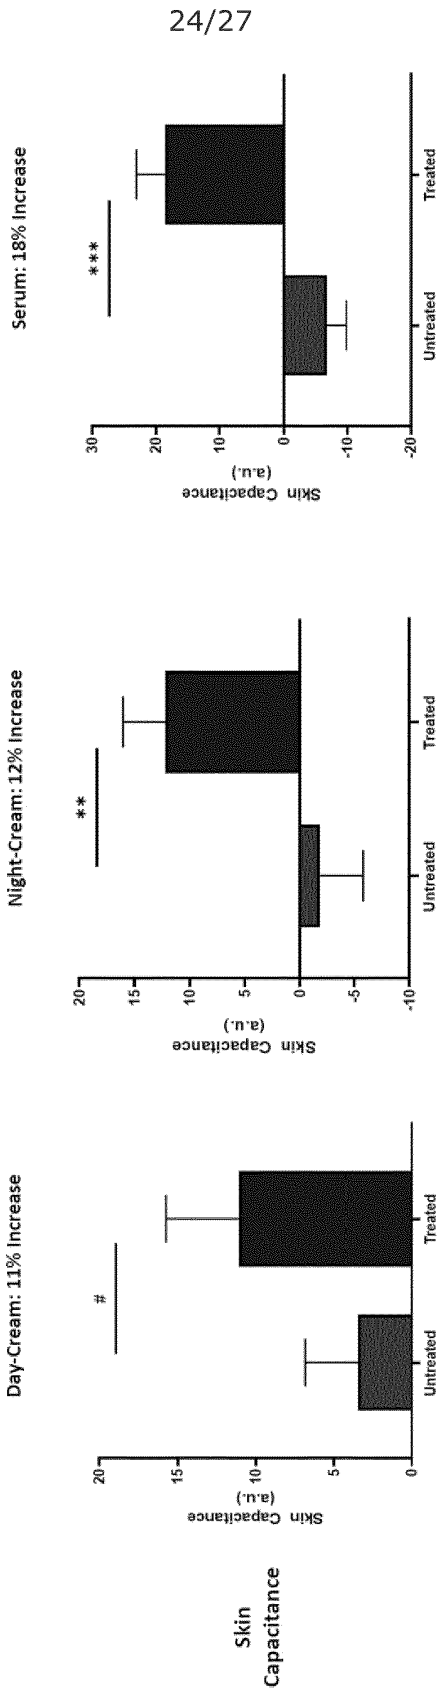

Figure 20

Clinical Trial Results Summary with topical UA

Endpoint(s)	0.5% UA Cream Only	1% UA Cream only	Day Cream (1% UA+ 0.25% Trehalose + 3% Niacinamide)	Night Cream (1% UA+ 0.25% Trehalose + 3% Niacinamide)	Serum (1% UA + 0.25% Trehalose + 5% Niacinamide)
Wrinkle roughness/reduction	-	++	+++	+++	++
Skin Hydration	-	-	++	+++	+++
Skin Firmness/ Elasticity	-	-	+	+	+
Skin Barrier	-	-	+	-	-
UV Photo-protection	-	++	NA	NA	NA

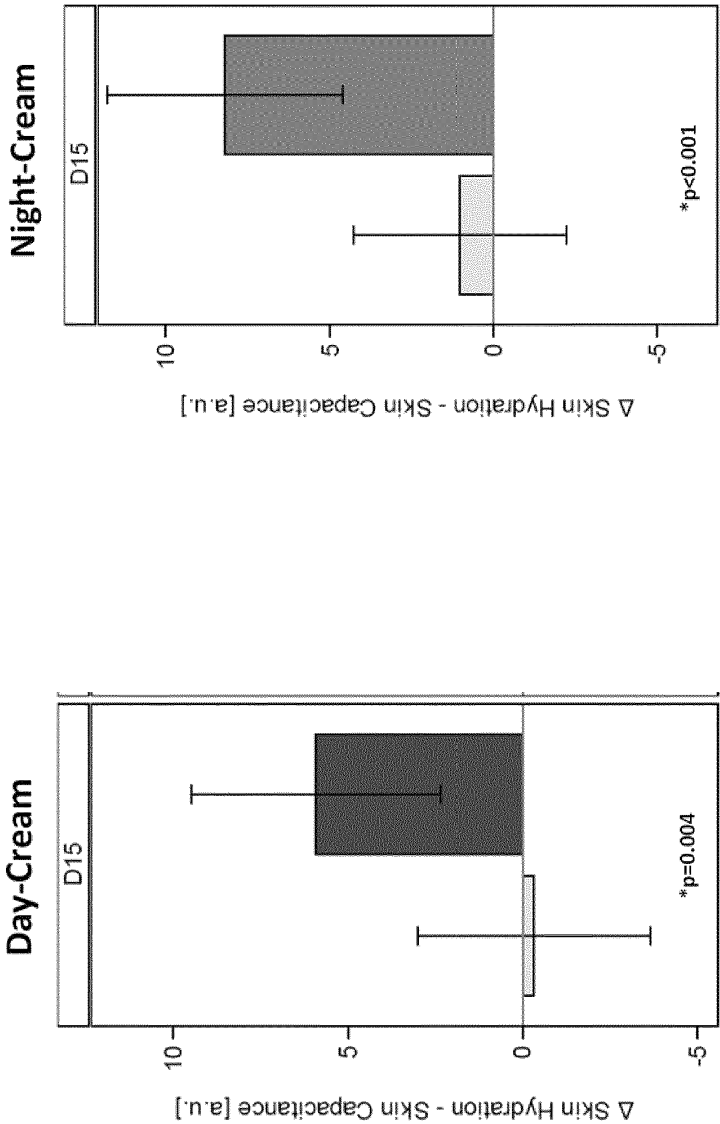

+++ : highly significant improvement (p≤0.01)
+ : significant trend to untreated (p=0.051 to 0.1)
NA: Not available data

++ : significant improvement (p≤0.05)
- : no impact

All statistical analysis shown comparing delta change from baseline b/w untreated/Placebo vs. treated side

Figure 21

Skin Hydration improved with both day and night creams:
Effect already visible at 2-weeks post topical application

All statistical analysis shown comparing delta change from baseline b/w untreated vs. treated side
