

[Invention Title]

PHARMACEUTICAL COMPOSITION FOR PREVENTION OR
TREATMENT OF CANCER COMPRISING LEUCONOSTOC SP. AS ACTIVE
INGREDIENT

[Abstract]

The present disclosure relates to a composition for prevention or treatment of cancer, the composition containing, as an active ingredient, a strain belonging to the genus *Leuconostoc*, isolated from kimchi, or a culture thereof. The genus *Leuconostoc* strain or the culture thereof according to the present disclosure exhibits excellent anticancer activity, and thus can be advantageously used as a composition for use in treatment, prevention, alleviation, or the like, of human or animal cancer.
