(54) **Title**: COMPOSITIONS AND METHODS FOR NON-SURGICAL TREATMENT OF PTOSIS

(57) **Abstract**: Provided are pharmaceutical compositions, and methods of use of the compositions, for the non-surgical treatment of ptosis (eyelid droop). In one embodiment the composition includes oxymetazoline 0.1% formulated for topical administration to an eye. In one embodiment the composition includes a synergistic combination of oxymetazoline and phenylephrine, formulated for topical administration to an eye. Oxymetazoline alone causes no pupillary dilation (mydriasis), and a synergistic combination of oxymetazoline and phenylephrine induces no clinically significant mydriasis. In addition to providing desirable cosmetic effects, the compositions and methods of the invention can improve visual fields otherwise compromised by ptosis.
