

[ABSTRACT]

The present invention aims to provide a borate compound-containing composition soluble in hydrocarbon solvents and useful as a cocatalyst for solution polymerization of olefins or dienes, and a production method thereof. The present
5 invention relates to a composition containing base A, or a compound having a total carbon number of not less than 8 and represented by the following formula (5):

wherein each symbol is as defined in the DESCRIPTION, and a borate compound represented by the following formula (1):

wherein each symbol is as defined in the DESCRIPTION. The
15 present invention also relates to the production method of the composition.
