performing a conversion between a video
comprising one or more video sublayers and a
coded representation of the video

702

FIG. 7

(57) **Abstract:** Several techniques for video encoding and video decoding are described. One example method includes performing a conversion between a video and a bitstream of the video according to a rule. The rule specifies that a subpicture sequence includes (1) all subpictures within the target CVs that have a same subpicture index and belong to layers in the multi-subpicture layers, and (2) all subpictures in the target CVs that have a subpicture index of 0 and belong to layers of the OLSs but not in the multi-subpicture layers.
