

PLANE TRACTOR

ABSTRACT

5 The invention relates to a plane tractor (1) which grips the nose gear of a plane,
including: a chassis (5); wheel modules (3) connected to the chassis, each wheel module
including at least one actuator for inducing a vertical movement of the module in
relation to the chassis; a gripping platform (2) for gripping the nose gear of a plane (4),
10 the platform together with the chassis having freedom of movement substantially in
circular translation; and a damping and actuating means connecting the platform and the
chassis.
