

Abstract

Device having a scanning unit and a mounting aid and method for mounting the scanning unit

=====

The present invention relates to a device having a scanning unit (2) and a mounting aid (3) with which the scanning unit (2) can be rotated about a rotational axis (D) of a reference element (4). The mounting aid (3) is designed to force the scanning unit (2) in a spring-loaded against the reference element (4) here.
