

ABSTRACT

The present invention aims to provide a Thermo-Acidophilic Bacilli inhibitor, a method of preventing
5 contamination by Thermo-Acidophilic Bacilli, and a beverage,
which utilize as an active ingredient a substance having
the effect of inhibiting the growth of Thermo-Acidophilic
Bacilli. The present invention relates to a Thermo-
10 Acidophilic Bacilli inhibitor containing xanthohumol as an
active ingredient, a method of preventing contamination by
Thermo-Acidophilic Bacilli using the same, and a beverage
containing the same.
