Abstract of the Disclosure (FIG. 1)

"TELEVISION SYSTEM FOR PROVIDING INTERACTIVE TELEVISION PROGRAMS AND SERVER SYSTEM FOR CONSTRUCTING THE TELEVISION SYSTEM"

Disclosed is a television system in which two-way television sets (1-1, 1-n) communicate with a server (3) via a communication network (4). Each interactive television (1) includes a program control unit (8) for controlling interactive data exchange between a viewer, a response receiving unit (23) for identifying a response from the viewer to the program from input signals to the television (1), and a communication control unit (9) for controlling communications with other nodes. The server (3) includes a communication control unit (30) for controlling communications with other nodes, a program information DB (15) storing procedures in units of programs, a response processing function (11) for arranging response data in units of programs.
