WO 2003/038583 A3

(54) Title: CONTEXT MANAGEMENT SUPER TOOLS AND FILTER/SORT MODEL FOR AGGREGATED DISPLAY WEBPAGES

(57) Abstract: An information aggregation and management system and method having selective "drill-down" capabilities and employing an Object-Action Navigation methodology. A user first selects an object of interest, and then selects one or more actions to perform on said selected object. An informational object may be selected from a Context Pane, and then an available action for that object may be selected from execution. A Content Pane displays the results of the actions on the object or objects. The user may rearrange, summarize, maximize, filter and sort information for display to effectively manage display area and minimize operations necessary to obtain information and analysis of interest.
