

ABSTRACT

LIQUID COOLING PLATE OF BATTERY PACK, BATTERY PACK HAVING SAME, AND VEHICLE

5 Provided are a liquid cooling plate of a battery pack, a battery pack having same, and a
vehicle. The liquid cooling plate has a bottom access opening, and a liquid flow channel formed
in the liquid cooling plate. A liquid inlet and a liquid outlet are formed at an upper surface of
the liquid cooling plate. The bottom access opening is located between the liquid inlet and the
liquid outlet.
