(54) Title: PHARMACEUTICAL COMPOSITION FOR THE TREATMENT OF FUNGAL INFECTIONS

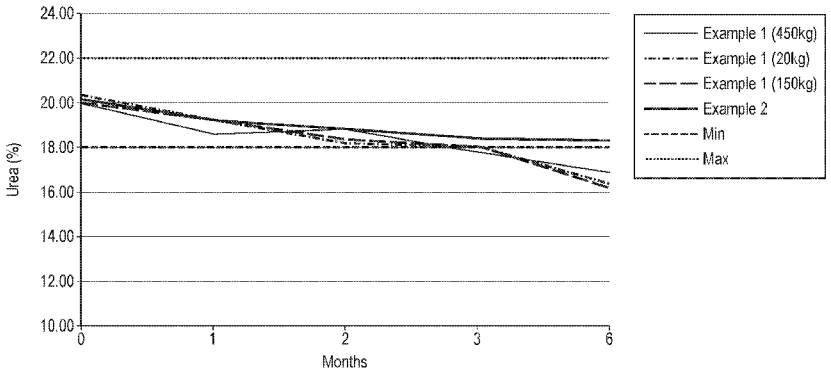

FIG. 1

(57) Abstract: There is provided pharmaceutical compositions suitable for topical application to the nail for the treatment of nail diseases such as onychomycosis,comprising a urea-based component,a diol component, such as propylene glycol,an organic acid component, such as lactic acid,and a triol component, such a glycerol. There is further provided methods of improving the storage stability of a pharmaceutical composition suitable for topical application to the skin and/or nails comprising such urea-based components,diol components,organic acid components,and,optionally,an aqueous base,which method comprises adding a triol component, such a glycerol,to that composition prior to said storage.
