(54) Title: CONDUIT SECUREMENT DEVICE

Fig. 14a

(57) Abstract: P325732WO ABSTRACT Title: Conduit Securement Device (Figure 14(a)) Disclosed is a conduit securement device, for securing a conduit such as a medical conduit. The device has a body defining a channel for receiving the a conduit and two arrays of fins 5 extending from opposed sides of the channel and oriented at an acute angle in relation to a longitudinal direction along the channel. The arrays of fins are oriented in opposite directions in relation to one another. A conduit inserted in the channel resiliently deforms at least the ends of the fins, and friction between the fins and the conduit provide resistance to longitudinal motion of the conduit along the channel, i.e. "pull resistance", in either direction.10
