(54) Title: VIRTUAL CHARACTER STATE SETTING METHOD AND APPARATUS, AND STORAGE MEDIUM AND ELECTRONIC DEVICE

(54) 发明名称: 虚拟角色状态的设置方法和装置、存储介质及电子设备

S202 Display, in a state display interface of a target application, state identifiers of a first group of virtual characters and a target virtual character, wherein the target virtual character is a virtual character that is controlled by a target account, which is currently logged in to the target application

S204 In response to a trigger operation on a first state identifier in the state display interface, set the current state of the target virtual character to be a first state corresponding to the first state identifier, and display, in the state display interface, a state identifier of the target virtual character as the first state identifier, wherein the first state identifier is a state identifier of a first virtual character in the first group of virtual characters, and the current state of the first virtual character is the first state

(57) Abstract: Disclosed in the present application are a virtual character state setting method and apparatus, and a storage medium and an electronic device. The method comprises: displaying, in a state display interface of a target application, state identifiers of a first group of virtual characters and a target virtual character, wherein the target virtual character is a virtual character of a target account, which is currently logged in to the target application; and in response to a trigger operation on a first state identifier in the state display interface, setting the current state of the target virtual character to be a first state corresponding to the first state identifier, and displaying, in the state display interface, a state identifier of the target virtual character as the first state identifier, wherein the first state identifier is a state identifier of a first virtual character in the first group of virtual characters, and the current state of the first virtual character is the first state. By means of the present application, the technical problem, in the relevant art, of complexity being relatively high during a process of setting the state of a virtual character is solved.

(57) 摘要: 本申请公开了一种虚拟角色状态的设置方法和装置、存储介质及电子设备。其中, 该方法包括: 在目标应用的状态显示界面中显示第一组虚拟角色的状态标识及目标虚拟角色, 其中, 目标虚拟角色是目标应用当前登录的目标账号的虚拟角色; 响应于在状态显示界面中针对第一状态标识的触发操作, 将目标虚拟角色的当前状态设置为第一状态标识对应的第一状态, 并在状态显示界面中将目标虚拟角色的状态标识显示为第一状态标识, 其中, 第一状态标识是第一组虚拟角色中的第一虚拟角色的状态标识, 第一虚拟角色的当前状态为第一状态。本申请解决了相关技术中在虚拟角色状态的设置过程中出现的复杂性较高的技术问题。
