

Abstract

5 A projectile (10.1, 10.2, 10.3), having a casing (14), a projectile base (12),
which closes the casing (14) off at the rear, a receiver coil (16) for receiving
electromagnetic signals, an energy source (22) which is put into contact with the
receiver coil (16), and a logic module (23). The casing (14) is made from a plastic
material, at least in the area of the rear.
