Abstract

The present disclosure relates to use of a compound represented by formula (I), or a stereoisomer, a tautomer, a deuterated form, a solvate, a prodrug, a metabolite, a pharmaceutically acceptable salt thereof, a cocrystal or a composition thereof in preparing a medicament for treating central neuropathic pain. The present disclosure further relates to a method for treating central neuropathic pain, comprising: administering an effective amount of the compound represented by formula (I), or the stereoisomer, the tautomer, the deuterated form, the solvate, the prodrug, the metabolite, the pharmaceutically acceptable salt, the cocrystal or the composition thereof.
