S-TRIAZOLYL α-MERCAPTOACETANILIDES AS INHIBITORS OF HIV REVERSE TRANSCRIPTASE

ABSTRACT

A series of S-triazolyl α-mercaptoacetanilides having general structure (1) are provided, where Q is CO_2H, $CONR_2$, SO_3H, or SO_2NR_2. The compounds inhibit several variants of the reverse transcriptase of HIV, and are useful in the treatment of HIV infections.
