ABSTRACT

An integral type air conditioner includes a
5 partitioning plate (5) partitioning the interior of the
main body (3) into an indoor side chamber (A) and the
outdoor side chamber (B). A suction port (13) for
introducing air in the outdoor side chamber into the
indoor side chamber, and a damper (16) positioned in
10 the outdoor side chamber for opening/closing the
suction port. In the indoor side chamber, there is
provided a cross-flow fan (20) with a rear casing (28).
Further, on the windward side portion of the rear
casing, there is provided auxiliary suction ports (34)
15 communication to the suction port.
