(54) Title: METHOD FOR CLEANING A SURFACE

(57) Abstract: Disclosed is a method for cleaning a surface of a plate-like article. The method comprises the steps of: treating the surface with free flow cleaning, wherein liquid is dispensed through a dispense nozzle onto the surface in a continuous liquid flow, and treating the surface with spray cleaning, wherein liquid is directed through a spray nozzle towards the surface in form of droplets. The surface is treated with a spray cleaning step before the free flow cleaning step and a spray cleaning step after the free flow cleaning step.
