Title of Invention: ACTION RECOGNITION METHOD, APPARATUS AND SYSTEM FROM MULTIPLE VIDEO STREAMS

ABSTRACT

The present disclosure provides a method, an apparatus and a system for recognizing an action of an object from a first plurality of video streams, the method comprising: detecting the object from each of the first plurality of video streams; and assigning one of the first plurality of video streams to one of a second plurality of processing units to recognize the action of the object based on an accuracy in recognizing the action of the object of the one of the second plurality of processing units.
