

ABSTRACT

In accordance with the present invention, an apparatus for controlling performance of a fluid machinery by
5 controlling rotational speed of the fluid machinery is provided. The performance regulating device for the fluid machinery includes a frequency converter (48), a casing (46, 47) for housing the frequency converter (48) so as to ensure airtight against an atmosphere, an input means (114) and an
10 output means (115) connected to the casing so as to ensure airtight against the atmosphere.
