- (54) Title: DISPENSER WITH HOLDING SYSTEM FOR RECEPTACLES OF DIFFERENT SIZES

FIG. 2

(57) Abstract: The invention concerns a beverage dispenser (1) comprising a base (2) and a holding system that comprises a holding part (3) positionable beneath a beverage outlet (4) in order to accept a first, relatively small receptacle, and being configured and dimensioned to be moveable between a deployed holding position suitable for accepting the small receptacle and a second position in which the holding part is moved at least partly out of the way of the beverage outlet to create an unoccupied space in which a second, larger receptacle can be positioned, in place of the first receptacle, beneath the beverage outlet, wherein the holding system comprises a sensor (8) configured for detecting the position of the holding part between the first position and the second position.
