

DECORATIVE LAMINATE

ABSTRACT OF THE DISCLOSURE

A decorative laminate of the present disclosure includes a decorative layer and a core layer. The decorative layer includes a decorative paper and a thermosetting resin. The core layer includes: a fibrous base material; an organic resin component; and an inorganic filler including endothermic metal hydroxide and/or an inorganic substance other than the endothermic metal hydroxide. The inorganic filler includes: a small particle diameter filler having a first average particle diameter; a medium particle diameter filler having a second average particle diameter larger than the first average particle diameter; and a large particle diameter filler having a third average particle diameter larger than the second average particle diameter.
